	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 8 of 69 pages

1. BACKGROUND

These procedures are prepared solely for the restoration of business operations following a disaster occurred in Energi Mega Persada (EMP) Head Office and its subsidiaries which located at Bakrie Tower Building.

Company of Energi Mega Persada consisted of:

- PT Energi Mega Persada Tbk.
- EMP Bentu Ltd. & EMP Korinci Baru Ltd.
- EMP Malacca Strait S.A
- PT EMP Tonga
- EMP Gebang Ltd.
- PT Visi Multi Artha
- Buzi Hydrocarbons Pte Ltd

"EMP" is used throughout these procedures. The Plan is designed to co-ordinate the restoration of business operations following a disaster that destroys all or part of the Bakrie Tower Building in Jakarta.

The objective of the Plan is to minimize the impact of a disaster on EMP's operations and profitability while restoring critical functions as quickly as possible.

2. SCOPE

In this plan there is no attempt to anticipate the type or severity of the business interruption. Instead, the Plan is meant to be a general framework which will organise and prioritise recovery efforts while remaining flexible and adaptable. It does not attempt to remove management options or judgement in response to the situation.

3. OVERVIEW OF THE BUSINESS RESUMPTION PLAN

The Plan is presented in two major parts:

- 1) The first part (Sections 1-8) describes overall objectives and general recovery requirements. It includes procedures for dealing with the disaster, notifying employees and interfacing with the media and/or Government. It provides for resumption of critical operations through the immediate establishment of a Recovery Command Centre, telecommunication links and temporary workspace for executives and critical personnel.

emp	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 9 of 69 pages

- 2) The second part (Sections 9) contains departmental recovery programs for each department in the company. These programs include procedures for restoration of individual departmental activities, replacement of communications equipment, personal computers, and other departmental equipment.

4. RECOVERY TEAMS

The Plan establishes four groups, which are assigned the responsibility of executing the Business Resumption Plan:

- (a) Evacuation Team
- (b) Executive Recovery Team
- (c) Physical Recovery Team
- (d) Departmental Recovery Co-ordinators of Business Unit and Central Function

The specific responsibilities of these groups and their reporting relationships are detailed in Section 3 of this document.

5. CALL OUT TREE

Following a disaster which destroys or renders unsafe all or part of the Bakrie Tower Building, recovery team members, executive management, and other employees will be contacted through the Call Out Tree which will be used to communicate both the initial disaster and subsequent important announcements.

The Call Out Tree begins when the Security Coordinator notifies the Chairman of the Physical Recovery Team that a disaster has occurred. The Physical Recovery Team Chairman will then contact other recovery team members and executive management who will in turn contact their direct reports. Each successive level of management will telephone subordinates until all employees have been contacted.

In this manner critical information will be passed quickly to the employees. Representatives will also be stationed at the site to inform employees that either could not be reached or do not have telephones.

The Call Out Tree is illustrated in Appendix B.

emp	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001

Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 10 of 69 pages

6. RESPONSIBILITY OF MAINTENANCE THE BUSINESS RESUMPTION PLAN

Industrial Relations & Services Division has responsibility for distributing, maintaining, and updating this manual. It is anticipated that the Plan will be updated annually to incorporate changes in personnel, facilities, equipment, etc.

7. RECOVERY TEAM RESPONSIBILITIES

7. 1. Evacuation Team

This team is called into action in the event of any emergency or disaster. It is the first group to be activated and would actually be on the site during an emergency response. Activation of this team does not necessarily mean that the Business Resumption Plan or even other teams will be activated if the damage is light.

The members of the Evacuation Team are listed in Appendix A (also refer to EMP Evacuation Procedure).

The Evacuation Team's primary responsibilities are outlined below:

(a) Co-ordinate Building Evacuation

The Evacuation Team Chairman will be notified of the emergency by Security Coordinator. If the disaster occurs during office hours, the floor Fire Wardens, First Aider and Security personnel will ensure an orderly evacuation of the building.

Evacuation Team First Aider will provide medical assistance as necessary. In the case of a fire, Fire Wardens and Security personnel will attempt to put out the fire as long as it poses no threat of personal injury.

(b) Assist City Emergency Services

Security Coordinator will call on city emergency services such as the Fire Department, Police, or Paramedics to come to the facility. The Company Doctor will ensure that medical treatment is administered where necessary and that emergency services are co-ordinated to provide help where it is most needed.

	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001

Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 11 of 69 pages

(c) Assess Health Risk

The Evacuation Team Chairman along with the SHE Representative (Risk & Operations Integrity Manager) and city emergency crews will determine whether escaping gases, chemicals, etc. pose a health hazard to employees on the site or within the immediate area.

(d) Subsequent Safety Concerns

The Evacuation Team will be responsible for safety issues during cleanup. It will also be responsible for obtaining Government agency clearance to re-enter the building following a disaster.

7. 2. Executive Recovery Team

The Executive Recovery Team will consist primarily of BOD, VP/GMs and Centralized Function Leaders. It will also include the chairman of the Physical Recovery Team in order to keep the Executive Recovery Team continuously appraised of the recovery efforts. This team will meet as often as necessary to review progress, make decisions, disseminate information, etc. In the event of a damaged but usable Bakrie Tower Building, the Executive Recovery Team will be given priority space along with other top-level management.

The members of the Executive Team are listed in Appendix A.

The Executive Team's primary responsibilities are outlined below:

(a) Supervise Recovery Effort

The Executive Team will supervise the actions of the recovery teams, giving advice and making decisions as necessary.

(b) Communicate With Stake Holder & SKKMIGAS/MIGAS

Stake Holder & SKKMIGAS/MIGAS should be notified of any disaster, significant business interruption or any event, which may result in adverse publicity for the company. The Chairman of the Executive Recovery Team is responsible for notifying Stake Holder & SKKMIGAS/MIGAS of the situation and its severity. The names and numbers of personnel that should be contacted in Stake Holder and SKKMIGAS/MIGAS are listed in Appendix C. Subsequent to initial notification, the chairman of the Executive Recovery

	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001

Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 12 of 69 pages

Team will keep Stake Holder management appraised of progress in the recovery effort, changes in work location, etc.

(c) Obtain Authorisations and Approvals for Recovery

The Executive Recovery Team is responsible for obtaining the necessary approvals from SKKMIGAS for recovery expenditures, leasing temporary or permanent space, etc.

(d) Establish New Team Members

If any team member is unavailable or unable to perform his responsibilities related to the Business Resumption Plan, the Executive Recovery Team will immediately appoint a replacement for the position.

(e) Interface with Media and Government Agencies

VP HC & Services as the Media Representative of the Executive Team will provide a single point of contact for the media and for Government agencies. All switchboard operators and security/receptionist personnel will be given the hotline number for the Media Representative. All personnel will be instructed to refrain from commenting to the media or the Government and will refer all inquiries to the Media Representative. All substantive statements to the media or the government will be cleared through the Executive Recovery Team Chairman, Corporate Management and SKKMIGAS as deemed required by the Chairman.

(f) Interface with Employees and Families

GPA Divisional Manager as the HR Representative will be responsible for communication with employees (including third party employees) or with concerned families, following execution of the Call Out Tree, as described in the sector 3 of this manual, the HR Representative or his alternate will provide a single point of communication to employees. Notices concerning work locations and hours will be disseminated by the HR Representative through the Call Out Tree or in writing as necessary. Security and reception/switchboards will be provided a hotline telephone number for the HR Representative or concerned families. This line will be manned as necessary by the HR Representative or his alternate.

	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 13 of 69 pages

(g) Ensure Funding, AFE, Control, etc.

Chief Financial Officer will act as liaison between Top level Management and the Physical Recovery Teams as well as Departmental Recovery Teams to ensure that Authorisations For Expenditures is obtained. In addition, this representative will ensure that appropriate financial controls are in place and that appropriate accounting activities are resumed. He will arrange for emergency cash to be on hand to defray the costs of purchasing new equipment, supplies and services.

Risk Management Manager will ensure that proper claims are filed with EMP's insurer.

(h) Address Legal Issues

Chief Legal Compliance for the Executive Recovery Team will assess legal exposure and ensure an appropriate legal response to any perceived legal threat arising from the disaster.

7. 3. Departmental Recovery Co-ordinators

The Departmental Recovery Co-ordinators will be contacted through the Call Out Tree.

Primary responsibilities of The Departmental Recovery Co-ordinators' are outlined below:

(a) Implement Departmental Recovery Plans

The Departmental Recovery Co-ordinators will have the responsibility of taking immediate action to initiate and implement their respective Departmental Recovery Plans. It will also be their responsibility to act as **liaison** to the Physical Recovery Team to ensure that emergency equipment, supplies and services are provided as documented within their respective plans. The Departmental Recovery Co-ordinators are responsible for keeping the Executive Recovery Team informed of the recovery progress within their Department.

	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
	Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.	Page 14 of 69 pages

(b) Prioritisation of Recovery Efforts

The Departmental Recovery Plans list the fundamental activities of each Department. These activities are prioritised according to their importance to EMP's operations as a whole.

The prioritisation schedule indicates the maximum amount of time that the activity can be interrupted:

A : 48 Hours

B : 7 Days

C : 30 Days

D : 30+ Days

In other words, the activities listed with an "A" priority need to be restored within 48 hours to avoid damage to EMP operations.

The Departmental Recovery Co-ordinators' responsibility to ensure that their Department' recovery efforts are directed at the most critical activities first. Appropriate prioritisation will help minimise the effect of the business interruption.

It is important to note that an ample work force to help restore critical activities exists in the employees that normally perform less critical functions. Thus when appropriate, The Departmental Recovery Co-ordinators should use employees performing less critical functions to help restore the critical activities in a timely manner.

The Departmental Recovery Co-ordinators are listed in Appendix A.

8. ASSOCIATED PROCEDURE

This Plan does not deal with disaster prevention; it is primarily physical recovery procedures. The Plan incorporates the existing Evacuation Plan and Information & Communication Technology (ICT) - Disaster Recovery Plan (DRP) which would be operating simultaneously in the event of a disaster, such as:

- (a) Evacuation procedures as well as personnel and medical issues arising from possible injuries or casualties are addressed by the Evacuation Plan, which is maintained by the HC & Services Department and SHE Department.

	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 15 of 69 pages

- (b) Restoration of server computing operations is addressed by the DRP, which is maintained by the ICT Department.

9. DETAILED PHYSICAL RECOVERY PROGRAM

9. 1. Damage Assessment

The Chairman of the Physical Recovery Team (PRT) will be contacted by Evacuation Team Chairman immediately upon any damage to the Bakrie Tower Facilities. The PRT Chairman then will proceed to the site and make an initial assessment of the damage along with the appropriate experts including Security Coordinator and the Evacuation Team Chairman. He will determine the extent of the damage and the course of action to follow. If the building is only partially damaged, health and safety clearance will be required from SHE Department, appropriate Government authorities, and the Executive Recovery Team Chairman before re-entry is allowed.

If the damage is deemed significant enough to require alternate space and a large-scale recovery effort, the Executive Recovery Team Chairman will implement the Call Out Tree described below, following PRT Chairman's recommendation.

After the full Physical Recovery Team has been mobilised, they will conduct an extensive study of the damage to the facility and determine the necessity for an on-site or off-site command centre and other alternate work site requirements.

Along with the results of the detailed damage assessment, the PRT should present to the Executive Recovery Team an estimate of recovery costs and recovery time. The Executive Recovery Team will use these estimates to obtain the necessary authorisations for a recovery program from Stake Holder and SKKMIGAS.

9. 2. Call Out Tree

The PRT Chairman along with Evacuation Team Chairman and security coordinator will proceed to the site to make an initial assessment of the damage. If the damage warrants notifying employees, The Executive Recovery Team Chairman will implement the Business Resumption Plan and initiate Call Out Tree following recommendation by PRT Chairman. The Executive Recovery Team Chairman and the PRT Chairman will be responsible for contacting their subordinates who will

emp	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 16 of 69 pages

in turn telephone subsequent levels of management until all employees have been contacted.

Employees will be advised of the extent of the damage and whether to remain at home pending further notification or to report to work at an alternate site.

Should subsequent communications be required, the VP HC & Services of the Executive Recovery Team will be responsible for ensuring that the call out sequence is implemented at the appropriate time.

An illustration of the Call Out Tree containing the names and phone numbers of the people to be called can be found in Appendix B of this manual. Appendix B also contains a list of Call Out Procedures. Please follow these procedures when calling fellow employees.

Security Personnel at Site

It is anticipated that many employees will not be reached through the Call Out Tree either because they are not at home or because they do not have telephones. Therefore it is the PRT's responsibility to have several security personnel stationed around the building on the next workday to intercept employees who were not contacted. These security personnel should be instructed to convey critical information such as when and where to report to work, to employees that arrive at the Bakrie Tower.

9. 3. Command Centre and Alternate Work Sites

If the Bakrie Tower Building is suitable for re-entry, the Executive Recovery Team and the Physical Recovery Team will receive priority quarters within the usable space. Should the facility not be available, the Executive Recovery Team and the Physical Recovery Team will proceed directly to the chosen alternate site.

(a) Supplying the Command Centre

VP SCM will be responsible for ensuring that the command center and the alternate work site for Executive management have ample working supplies. Additional office supplies can be ordered through ordinary procedures.

(b) Security at Alternate Work Sites

The PRT is also responsible for ensuring that there is adequate security at the Command Centre and at any other alternate work sites. The chairman of the

	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
	Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.	Page 17 of 69 pages

PRT should inform the IR & Services Divisional Manager as a leader of Security section to all new work sites. They should co-ordinate security at these sites bearing in mind that there may be significant media coverage, especially in the first few days after an accident, which would require additional security.

(c) Leasing New Office Space

In the event of severe or total damage to Bakrie Tower, it is anticipated that the Physical Recovery Team would attempt to rent semi-permanent office space or permanent office space. Semi-permanent office space would be occupied for 1-12 months while preparations are made to rent permanent space or reconstruction of Bakrie Tower space takes place.

It is not expected that management will have great difficulty in leasing semi permanent or permanent office space.

If new permanent space must be leased or if a major reconstruction effort is required, the Physical Recovery Team should obtain Executive Recovery Team approval.

(d) Recovery Priorities

The PRT must direct its efforts to restoring the most critical functions first. The PRT should attempt to provide space and equipment for the people that perform these activities within 48 hours. It should be noted that most of these critical activities are dependent on the server computer and on communications making restoration of these two functions the most important initial concerns.

If necessary, the PRT should draw upon the pool of employees that normally perform less critical activities in order to restore highly critical activities in a timely manner.

Within 7 (seven) days, all key personnel will be provided work space, furniture, and appropriate telecommunications equipment. Within 21 days, all personnel will be housed in alternate space with rented furniture and telecommunications equipment.

emp	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 18 of 69 pages

(e) Financial Control/Cost Recording

The SVP Finance will be responsible for ensuring that appropriate financial controls are exercised and that necessary cost recording is accomplished.

9. 4. Information & Communication Technology (ICT) Recovery

ICT Divisional Manager will be in charge of restoring communications in the event of disruption. Communications, both onshore and offshore are deemed critical to EMP's operations and are thus listed in Part 2 listing of Highly Critical Activities. Emergency levels of communications should be restored within 48 hours. Along with restoring general telephone communications, The Manager ICT will ensure that a direct line is available to the Media/Employee Representative of the Executive Recovery Team. The ICT Divisional Manager will also ensure that there are adequate telephone and fax lines for recovery teams and executive management at alternate work sites.

ICT Divisional Manager will inform VP HC & Services to notify Stake Holder and SKKMIGAS / MIGAS of new phone numbers and mailing addresses. This information should be communicated to Stake Holder and SKKMIGAS / MIGAS as soon as it is available.

9. 5. Recovery of Servers Computing Capabilities

Restoration of servers computing is covered by the Disaster Recovery Plan (DRP). An integral part of this plan is the operating and application system backups which are made weekly by ICT . This backed up information stored at the off Site. The DRP calls for critical computing operations to be re-established within 48 hours.

If the servers were damaged, the entire restoration process would be carried out by ICT personnel as documented in the DRP.

9. 6. Recovery of Personal Computing

Currently most of EMP personal computers and printers are rented from third parties. DRP does not cover this equipment and in the event of damaged or lost equipment, the ICT Divisional Manager would manage a subgroup which would be responsible for replacing it.

The ICT Group should see that an accurate summary of damaged/destroyed equipment is submitted to each computer leasing company which will then begin

	PROCEDURE	No. Dok.: EMP-IRS-PCR-00.001
	TITLE : BUSINESS RESUMPTION PLAN	Issued date : 1- 11-2020 Expire date : 31- 10-2023 Revision : 00
Originating Department: INDUSTRIAL RELATIONS & SERVICES DIV.		Page 19 of 69 pages

replacing the equipment as quickly as possible. Individual Departmental Recovery Plans stipulate the number of PC's required for each department and do contain EMP owned equipment.

The ICT Group should attempt to obtain notebook computers immediately. Notebook computers are particularly appropriate for the initial stages of recovery because they can be snared among users easily, they can be used at home if there is insufficient workspace and they can be moved easily if the temporary work site changes.

The ICT Group will also be in charge of acquiring necessary software for the new personal computers. Software requirements are also listed in the Departmental Recovery Plans. It will then supervise the installation of the computers and software. The PRT should work with the Departmental Recovery Co-ordinators to apportion the available equipment amongst Department and for the most critical tasks.

9. 7. Equipment, Supplies, and Services

VP HC & Services will manage a subgroup responsible for outfitting new or temporary space with necessary furniture, equipment and supplies.

Departmental Recovery Team members will be responsible for advising the VP SCM of any supplies or equipment needed specifically for their Department. Departmental secretaries along with GSS group would be responsible for procuring normal section supplies as is currently the practice. The Physical Recovery Team would be available to respond to any request for help in this area.

9. 8. Return to Permanent Offices

Following construction work, and clearance to re-enter the facility, the Physical Recovery Team would arrange for transfer of files, equipment, and supplies to the Bakrie Tower Building.

Appendix 2. CALL OUT TREE AND INSTRUCTIONS

NOTE: Please keep a log of the calls/text you make. It will prove very useful in organizing your calls and may be used later to determine which employees have been contacted and which have not.

- 1) Call/ texting/personal email all subordinates that report directly to you.
 - If busy, note in log and try number later.
 - If answering party says that the subordinate is not available, ask where he/she can be reached and leave message for subordinate to call you.
- 2) If subordinate is reached, identify yourself.
- 3) Tell why you are calling/texting/personal email. Be brief with any description of a disaster.
- 4) Inform of working conditions.
 - Where to report
 - When to report
 - Ask them not to call EMP; they will be notified if conditions should change.
- 5) Remind them not to talk to the media/personal social media.
- 6) Remind them to call/ texting all direct reports (if applicable).
- 7) If subordinate is a Business Resumption Plan team member, ask him to bring his copy of Business Resumption Plan and his personnel listing.
